

I believe my amendment rights will be violated if you ban satellite radio. I have the freedom to choose what me and my family listens to. I subscribe to satellite radio. They specialize in children's channels, religious channels, etc. The weather that they broadcast is very informative as my family travels, therefore, making our trips and children safer. The FCC should be working on cleaning up the air waves of regular radio and television stations. The language and video are terrible for families to watch or listen to. The ones who are complaining are the ones that need stricter governing. Thank you for your time.
